

3-Bin Composting

Just found this video on making a 3-bin composting area. When I started to watch I thought - too much work! But then I saw the small home garden version (2:11 on the video) made of branches. It is so pretty. I want that! Jim, are you reading this? Can we make it? Please? I know I could do it myself, but my constructions tend to be flimsy (should I say... slapdash?).
