

Parks & Gardens Featuring CA Native Plants

Nothing like a rainy day to get me to check and correct info on this website! I spent the day converting an old pdf file of "Where to See Native Plants" to a new and hopefully more accurate webpage of [Parks & Gardens Featuring CA Native Plants](#). This all came about because I forget to include the wonderful [Nature Gardens](#) at the [Natural History Museum - LA](#).

Please let me know if you find any errors or can suggest gardens I have missed. Once the rains stop it will be a wonderful time to explore.
